High quality faxing for SOHOs

FAX-JX300

Plain paper FAX

256 Greyscale Levels

Business *can* be simple

*Refer to specifications table for detail.

The Fax-JX300 has a large capacity to handle small businesses. Its speedy fax scanning and printing abilities, coupled with Canon's FINE™ technology, ensure you get quality printouts every time. There's also a large fax memory of max. 120 pages and a 100-sheet automatic sheet feeder to keep up with all your business needs. And there's no need to worry about missing that important call – the Fax-JX300's built-in answering machine can take your messages when you step out of the office.

Crisp, clear faxing

The Fax-JX300's inkjet printing, that utilizes FINE™ cartridges, makes sure you get consistently brilliant faxes. Canon's proprietary FINE™ print technology redefines faxing with its 320-nozzle inkjet printing. It also improves the durability and quality of your personal fax machines at uncompromised speeds. In addition, 256 grayscale levels and Canon's Ultra High Quality (UHQ) processing method allow even subtle gradients to be captured.

Super speeds and faxing reliability

Speeded-up technologies ensure you get faxes, scans and prints in a flash. Faxing and copying are a breeze – The Fax-JX300's G3 fax modem transmits pages at a fast 6 seconds per page*, while fax scans are churned out at 10 seconds per page (or 6ppm*), and fax prints at 5ppm*. Its standalone fax nature ensures high faxing reliability without unnecessary interference. *Based on ITU-T No.1, STD mode

Special features

Fax cheque-size documents up to Legal paper size with ease. There's also a Report with Document Image printing feature for user convenience. In addition, a built-in TAM (Telephone Answering Machines) feature allows your friends or business contacts to leave a voice recording (up to a maximum of 30 minutes) if your paper or ink runs out, so you won't miss a single message.

More conveniences

With the Fax-JX300's 20-sheet auto document feeder and 100-sheet auto sheet feeder, you won't have to worry about running out of paper in the middle of faxing. In fact, there's also a max. 120-page memory for extra assurance. Other user-friendly touches include 109 speed dials, sequential broadcasting of up to 110 locations, a caller ID** feature and a Fax/Tel auto switch. **Please check with your local telecommunications provider

Saving the best for last

Despite its power-packed features, the Fax-JX300 consumes very little power. The minimum power consumption at sleep mode is at a mere 1.5W. And electricity's not all you save on – there's an Ink Saver mode with a capacity of up to 965 pages, too.

Protect your Canon device with Canon Genuine Ink Cartridges.
